

## Sherburn Café

# Setting the scene

As Magic Box International pushes across a number of markets both here in the UK and internationally with a wider product range including both retro-fit and integrated systems. Working with a more diverse network of partners now allows us to welcome the possibility of working on new projects that may not have been considered previously.

A growing number of these partners look to integrate our thermodynamic Solar Assisted Heat Pumps into more and more commercial

units with this example in the North West of England highlighting how our SAHP 200 is installed and being used to generate all of the hot water needed in this thriving cafe at a cost of only 25.6 pence per day!

**Contact the team now to find out more about the benefits of the SAHP 200 and how it can generate up to 100% of your hot water demands day and night, all year.**
