

## Moira Drive Thru

# Setting the scene

Another great light commercial installation using our all-in-one SAHP130 litre system, sees the Moira American Diner and Drive Thru use the system to supply all of their hot water demands!

The restaurant that has featured on channel 4's Fonejacker program - Pranking unsuspecting members of the public, offering a range of American and UK favourites has been benefiting from generating their own hot water for just over 6 months. The owners

have expressed their delight at how well the system works, ensuring hot water is available as they need it, with both staff members and the public drawing from the system.

**Contact the team now to find out more about the benefits of our BMTB range and how it can generate up to 100% of your hot water demands day and night, all year.**
